

Frequently asked questions

Are Einstein's Entertainers science parties' fun?

Absolutely, both children and parents love our science parties. All parties include something to take home – our basic and premium parties include both slime and rainbow glasses to take home. Our spooky science parties include fake, edible blood and slime, and our pink potions parties include scented bath bombs and pink slime! Our premium candyfloss extension includes a bag/stick of candyfloss for each child.

What will happen at my science party?

An Einstein's Entertainer will (with the help of plenty of volunteers) perform some amazing interactive science demonstrations. As mentioned above, all children get something to take home.

Slime sounds great...but won't the children get messy?

Every year we have the pleasure of making slime, bath bombs, fake blood and all kinds of other experiments with thousands of children. We've just about perfected giving the children the chance to make slime without making a mess! We promise that your Einstein's Entertainers science party will be mess, stress and hassle free!

Can you provide invitations?

We provide free e-invitations which can be emailed to you once you have booked your party.

A certificate for the birthday boy or birthday girl?

Absolutely, we will bring this on the day and present to the birthday child at the end of their special day.

How long will my science party last?

It's up to you! It all starts with the Basic Party (1 hour) and our Premium options (20/30 minutes each) can be added to the party as per the booking form.

Where will my science birthday party be held?

Your birthday party will be held at your chosen location. Either at your home or in a hall or venue. *Please see the booking form for requirements.*

What do you need from me for the party?

Our science party has been designed to be self contained. All we need from you is a sensibly sized space for the number of children who will be attending. We only need the use of a table and access to electricity and a sink.

What is the perfect age range for the science party?

The science birthday parties are really suitable for children from 6-12. (*Children under 5 must be accompanied by an adult at all times*)

I would love the premium option, but can I fit in a food break during the entertainment?

Absolutely! For all premium parties we recommend a break after the first hour for food/birthday cake. We ask you to mark this on the booking form (*breaks offered during premium parties only*).

When can I have an Einstein's Entertainers science party?

We present programs seven days a-week! Please check dates as we book on average two months

in advance, but please check with us as we may have a date free within the two month booking period.

How many children can come to my science party?

Between 10-20 works best as the children get to be really involved. There is no maximum number, but there is a surcharge of £5.00 per head after 20. Please let us know as far ahead as possible how many children will be attending, as we may need to provide extra entertainers.

I'm not sure how many children will be at the science party?

That's no problem at all. All we need is a rough idea in advance (so we can tailor the party to the size of the group). As long as we know at least a week before your party we can cater for this.

Is the science party safe?

Yes! All these experiments have been performed for years without an incident. We are also fully insured (with no intention of ever using it!)

Have you been CRB Checked?

We all hold Enhanced Criminal Record Bureau checks.

Will girls enjoy the science party or is it just for boys?

Our experience of thousands of children every year is that primary school aged girls and boys both love our experiments!

Do I need to have booked a hall before I get in touch?

No, it's best to contact us as early as you can so we can let you know when we're available. It can be easier to book the Einstein's Entertainers science party first and then confirm the venue afterwards.

Do you get booked up in advance?

It's always best to contact us as early as possible, as a guide most people book about two months in advance, but if you have left it till the last minute get in touch and we'd love to help you out if we possibly can!

What if my child has been to an Einstein's Entertainers science party or event before?

Please let us know as soon as possible if the birthday child or other children have been to any Einstein's Entertainers event before so that we can tailor your party with alternative experiments.

How much of a deposit is needed to secure my science party?

There is a 50% deposit to secure your party. This can be made by either cheque or BACS as per our terms and conditions on the booking form. You'll get a confirmation email to act as a receipt once we have the funds and confirm all of the important details.

What about party bags?

We offer party bags at only £3.00 per head to save you time and money. Our party bags will include 5 party toys for example; Chinese Finger Trap, Parachute Man, Touchable Bubbles, Aeroplane Glider, Clockwork Insect, Rocket Balloon, Jumping Beans (*please note these contents are not exact and are subject to availability*). They also contain a couple of sweets.

Do you only do birthday parties?

Not at all! We do absolutely everything from birthday parties, after school clubs, school assemblies,

and experiment evenings for uniformed groups, fetes, events and of course school visits too. Explore our website and please do get in touch if we can help you.

Do you cater for commercial organisations?

Definitely, just get in touch to see how we can meet your specific requirements.
